Perforated sheet metal suppliers south africa

Magnus was founded in December 2011 and is a trader of all manufactured steel products. Our well-trained employees have extensive knowledge of the steel industry and are always ready to assist them with the needs of our customers. From Latin means greatness, our name means superior power and incredible strength. Our goal is to focus this power on the needs of our customers and address all business with the spirit of a victorious warrior. Magnus, a name popular with early kings, wants to rule the steel industry with the aim of being reliable, victorious and always of greatness. Our meeting is made up of Magnus. Aperture Sizes Ranges: 2mm to 70mm Materials: 304 SS 430 SS 403 SS 3CR12 Panel Sizes: 305mm x 305mm or Costum Sizes Plate Thickness (mm): 1-12 Recommended Applications: Features and Benefits: Provides High Mechanical Strength, to support high density ore/feeds Ideal also for high temperature applications ZAR category /FIXING AND FASTENING/DIY/METAL SHEETS 948 328 METAL SHEETS 4 perforated sheets are supplied in the following materials: Mild Steel SS430 3CR12 Stainless Steel 304 Stainless Steel 316 Hardox For an accurate offer we need data on sheet length, width, outer edges, panel thickness, panel thickness, Distance of holes: The slope or center distance is defined as the distance from the center of the hole to the center of the hole in two adjacent rows. z.B. the hole size can be 10 mm, while the slope is 15 mm. The wall thickness between any two holes would then be 5mm. The lead edge is another necessary specification. Wire frame and perforated sheets webmaster@shelfarack 2018-02-05T11:30:51+00:00 For industrial mesh supply, we supply perforated plate. It is an excellent source for achieving sustainable design goals. Perforated plate is very versatile. It can be used for light decorative elements and supporting structural components. Perforated plate offers unique ways to combine power, functionality and beauty. Perforated panels are mostly made of carbon steel, but can also be made in aluminum and stainless steel. Opening sizes from 3 mm to each aperture according to the customer's wishes. We can make any perforation in sheets up to 8 mm thick. Typical plate sizes are according to customer requirements. Different perforations are punched from a selection of materials and vary in thickness from 0.5 mm to 6 mm. Other perforations are decorative patterns for architectural purposes.
